

## **Federal Executive Board – Administrative Services Meeting**

June 11, 2003 – 1:00 to 3:30 pm – Edith Green Federal Building

Implementing the President's Management Agenda on e-Government  
Roundtable Discussion 2

Topic: The Oregon/Washington BLM experience with Electronic Commerce

Author/Agency: Steven Shapiro – Bureau of Land Management

Summary: Status of the Bureau of Land Management's efforts in the Implementation of Electronic Commerce.

Web Site(s): <http://ideasec.nbc.gov>

IDEASEC - Is the Department of Interiors site for Electronic Commerce. BLM is currently using IDEAS Software to submit our solicitations and awards to Electronic Commerce.

We are successfully receiving electronic quotes (but not bids - due to electronic signature constraints) from Contractors.

Vendors have started downloading not only solicitation information, but also copies of awards they have received.

Vendors can view these documents either via links from FedBizOpps or by going directly to <http://ideasec.nbc.gov>

FedBizOpps – Is the Government-wide site for Electronic Commerce.  
All Oregon State Office solicitations that are posted to "electronic commerce" can be viewed via links on FedBizOpps.

All pre-solicitation notices are posted to FedBizOpps

Maps and Drawings:

All are posted in "PDF" format which can be viewed using Adobe Acrobat (which anyone can download for free)

CCR - Central Contractor Registration. Single place for Contractors to register their company's business information. Required for new contract awards or to receive contract payments starting on October 1, 2003

ORCA - On-line Representation and Certification Application. Allows for contractors to input their "reps and certs" in one place, rather than having to complete them for each solicitation they bid on.

- Application form has been developed and is being piloted by a few offices
- ORCA may be accessed via a link on the CCR website

One Time Data Entry - By using IDEAS starting with the requisitioner, we are achieving "one time data entry", as the data carries forward from the purchase request to the solicitation and on to the contract.

Web - Intranet is being used to share sample solicitations, specifications and clauses. Awarded IDIQ contracts are shown on the Internet so other agencies may utilize these contracts. ([www.or.blm.gov/procurement](http://www.or.blm.gov/procurement))

Internet is being used to share information with perspective contractors. Awarded IDIQ contracts are shown on the Internet so other agencies may utilize these contracts. ([www.or.blm.gov/procurement](http://www.or.blm.gov/procurement))

Synopsis of Discussion: BLM is moving ahead in the implementation of IDEAS EC.
